

Real time room & tour booking

Online Hotel Management Software

Booking a holiday was never so easy.....

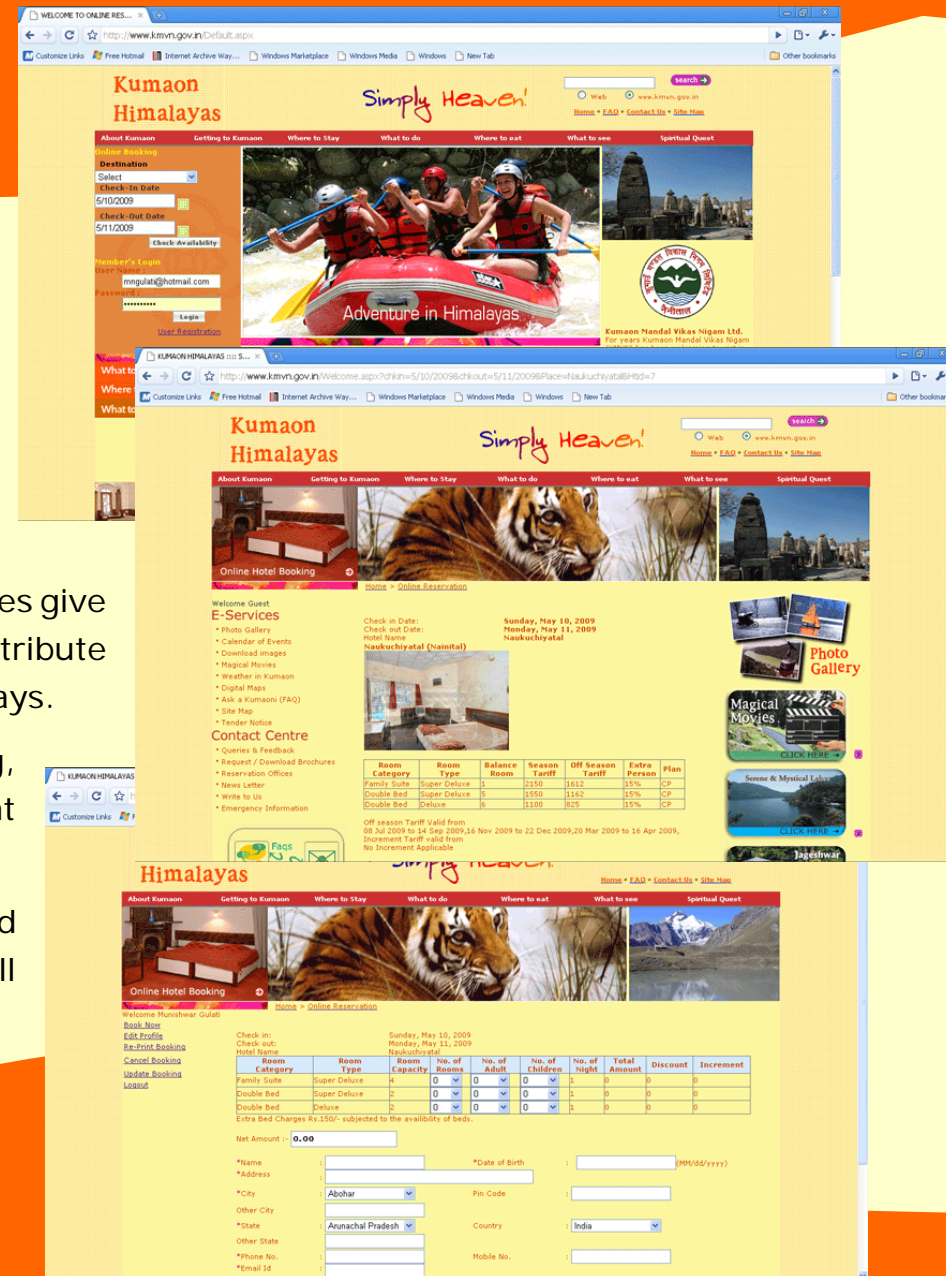

Online Hotel Management Software

The SMI Online Hotel Reservation System Software is designed not only to manage all types of hotel bookings, whether made directly by guests or through travel agents and corporate clients but also it can also function as either a separate dynamically driven hotel reservation and hotel booking website or a powerful addition to your current hotel website.

Its powerful hotel reservation, marketing & merchandising features give you the ability to control dynamic room or tour allotments, distribute confidential trade rates, provide varying rates for different seasons or days.

For your clients this system also features: quick rooms booking, registering on the site, rate management and credit card payment through your bank payment gateway.

Discover its powerful browser based online front-desk and administration, designed to be installed on your servers and we will integrate it seamlessly into either your existing or a new web site.

Online Hotel Management Software

Hotel Property Manager Portal

For a hotel group, property group, campground operators or booking agents, etc. It allows you to create an online reservation system for multiple properties within a single web site. Also allows you to create your own reservation portal and invite hotel and property owner to list their hotels etc. on your site and update / modify / administer their listing via unique username/password/Unlimited properties.

Electronic storefront

Designed to simplify the process of organizing, building and maintaining an electronic storefront, eBusiness model on the Web and can actively allow collaborative co-operation between your resellers, suppliers and consumers.

Enterprise Hotel Distribution Manager

Designed for property, tour and hotel groups or chains that are looking for a system that enables each of their properties or tour companies to distribute rates and inventory online and become part of a significant and powerful booking and reservation e-distribution centre.

Complex Tours or Super Tours

Easily handles complex trips and tours; each trip can be configured to have multiple levels of trip/tours under it; component trips can be configured not to show as a directly reserved trips but only show under packages and day trips/tours with trips under it. Behavior of component trip/tours under trips can be extensively configured.

Tour Manager Portal

For a tour group or booking agents, etc. It allows you to create an online reservation system for single/multiple tours/Unlimited tours. Also allows you to create your own reservation portal and invite tour operators to list their tours etc. on your site and update/modify/administer their listing via unique username/password.

Online Hotel Management Software
